OBJECTIVE

Final-year Computer Science student (Delhi University) seeking an AI & Automation internship. Hands-on experience building AI-driven XR systems, training reinforcement learning agents (Unity ML-Agents / Python), and automating workflows via REST APIs and Telegram Bot integrations. Proven track record leading cross-functional teams and delivering end-to-end software solutions across AI, automation, and AR/VR domains.

SKILLS

AI & ML	Reinforcement Learning (Unity ML-Agents), Python (NumPy, Pandas), REST API integration, LLM/GenAI API (Anthropic/OpenAI), Prompt Engineering, Scikit-learn
Automation & APIs	Telegram Bot API, REST APIs, Node.js automation scripts, Real-time data pipelines, Azure Kinect SDK, Workflow automation, CI/CD basics
Technical	C#, C++, Python, JavaScript Unity 3D, Unreal Engine, ARCore, WebXR, Three.js, Node.js SQL, Database Management Git/GitHub Data Structures & Algorithms
Soft Skills	Project Management, Problem Solving, Leadership, Communication

WORK EXPERIENCE

Founding Member & ex-CTO (VR Developer) — XRVisionLabs	May 2025 – Apr 2026
- Led a 6-person multidisciplinary team of developers, designers and researchers, delivering 2 client projects across 12 months. - Integrated AI/ML components into immersive experiences, translating client requirements into automated, scalable technical solutions. - Maintained 100% on-time delivery across 3 product releases, overseeing quality assurance for XR and AI-powered applications. - Reduced client onboarding time through standardised XR development pipelines and documentation.	
Game Development Intern — AltReality Labs	Aug 2024 – Apr 2025
- Built 3 physics-based simulation systems (archery, bowling, road-crossing) shipped in production using Unity; implemented adaptive AI behaviours for dynamic obstacles and scoring. - Developed and tuned projectile motion and rigid-body physics pipelines for realistic, automated game interactions.	
VR Research Intern — Delhi University	
- Built and maintained real-time data processing and debugging pipelines for motion tracking systems using Azure Kinect, processing skeletal data at 30 fps. - Automated full-body XR tracking workflows; experimented with sensor fusion and real-time skeletal data to drive virtual avatars, reducing manual setup time significantly. - Developed prototype AI interaction systems in Unity and Unreal Engine.	

PROJECTS

TeleAttendance — Automated Attendance System: Fully automated attendance tracking via Telegram Bot API, Node.js, and REST APIs with database storage; eliminated 100% of manual data entry for a cohort of users. Reinforcement Learning Agent (ML-Agents): Trained adaptive AI agents using Unity ML-Agents toolkit and Python; implemented reward shaping and policy iteration for complex behaviours across multiple training environments. TeleTwin — Telecom Digital Twins: Realistic real-time digital twins of telecom towers enabling remote monitoring and predictive maintenance workflows with near-real-time data refresh. Combat-XR — Defence Training Simulator: Tactical VR simulation with AI-driven scenario management for defence training use cases. XRchitect — Multiplayer VR Interior Design App: Multiplayer VR application using Meta XR SDK and Photon for real-time collaborative design.	
---	--

- **AR Indoor Navigation:** Marker-based real-world navigation using WebXR and SVG mapping; automated path-finding overlaid on physical spaces.
- **Unreal Pixel Streaming Demo:** Deployed Unreal project with browser-based streaming, automating build and distribution pipeline.
- **LifeTime Calendar:** Mobile web app to mark recurring event dates independent of year, with automated reminder logic.

EDUCATION

Qualification	Institution	Year	Result
B.Sc (Hons.) Computer Science	Delhi University	2027	CGPA: 7.72 / 7.72
CBSE (PCM) — Class XII	N.K. Bagrodia Public School	2023	89.2 %
CBSE — Class X	N.K. Bagrodia Public School	2021	87.8 %

CERTIFICATIONS

- Unity Development — Udemy
- AI Workshop — BE10X
- Augmented Reality — FreeCodeCamp

CAMPUS LEADERSHIP & INITIATIVES

- Data ManagementHead — PlacementCell

Aug 2023 – Jul 2024
- Automated and maintained comprehensive student/alumni databases for placement and internship drives; coordinated recruiters with relevant candidate data.
 - Managed end-to-end operations of a placement drive, streamlining data workflows between placement coordinators and companies.

ACADEMIC ACHIEVEMENTS & RECOGNITION

- Guest Speaker at AWE Nite Orlando — international XR industry conference.
- Guest Lecturer at Jindal University of Art and Architecture (XR & AI).
- Contributed to I-Twin (Bentley Systems) and Mozilla Firefox open-source projects.
- Scored 94% in Computer Science, CBSE examination.
- School Rank 3 — Silver Zone Math Olympiad.

OTHERS

- Achieved 2 medals and 3 trophies in Hip Hop dance competitions.
- Represented School Counseling Committee for student leadership, peer support, and mental wellness initiatives.
