SUMMARY

Final-year Computer Science student (University of Delhi, 2027) with hands-on work in **reinforcement learning (Unity ML-Agents)**, **computer vision (YOLO)** and **LLM API integration**, plus production experience building real-time sensor and telemetry pipelines (BLE, MQTT, PostgreSQL) for a live airport automation system at GMR.

EXPERIENCE

AI and Automation Intern | GMR Group — Smart Airport City, IGI Airport *Jun 2026 – Present*

- Building the Android apps for **Smart Buggy**, an automated dispatch system that matches buggies to passengers with reduced mobility across **109 gates and points** at Terminal 3.
- Tablet streams **BLE-beacon indoor position, battery and seat data over MQTT every 1 s**, feeding an allocator that ranks buggies in **4 tiers** by pooling, availability and distance.
- Fleet health rules filter candidates in real time: **heartbeat under 15 s, battery above 30%**, on duty and not charging; distance-based ETA is shown to passengers.
- Every request, offer and decision is written to a **Postgres ride log** (tickets, offers, trips, walk-ups) for reporting, audits and future demand modelling.
- Built an **ARCore proof-of-concept** that validated the navigation flow of the airport's vendor-led AR wayfinding system.

Software Engineering Intern | Tap4Technologies (Remote) *Sep 2026 – Present*

- Working on **Carbon, an AI business OS for SMBs**: researched Salesforce and Mailchimp data models, OAuth and rate limits across **3 pull requests**; building the first CRM integration slice.

Founding Member & CTO | XRVisionLabs *Feb 2024 – Oct 2025*

- Integrated AI/ML components into immersive products for clients; owned the SDLC across **2 client projects and 3 releases, 100% on time**.
- Led a **6-person team** of developers, designers and researchers.

Virtual Reality Development Intern | University of Delhi *Feb 2024 – May 2026*

- Built real-time pipelines processing **Azure Kinect skeletal data at 30 fps**; experimented with sensor fusion to drive full-body avatars.

PROJECTS

Reinforcement Learning Agents — *Python, Unity ML-Agents*

- Trained agents with **reward shaping and policy iteration** across multiple training environments.
- Iterated on environment design and reward functions to improve convergence and generalisation over **500+ evaluation episodes**.

TeleTwin — Telecom Digital Twin — *Python, YOLO, PostgreSQL*

- Real-time digital twin of telecom tower assets combining a **YOLO computer vision pipeline** with a PostgreSQL data stream for remote monitoring and predictive maintenance.

TeleAttendance — Automated Attendance System — *Node.js, Telegram Bot API, REST*

- End-to-end automated pipeline with a Telegram bot interface; **removed 100% of manual data entry**.

SKILLS

AI / ML: Reinforcement Learning (ML-Agents), Computer Vision (YOLO), scikit-learn, NumPy, Pandas, LLM APIs (Anthropic, OpenAI), Prompt Engineering, model training & evaluation

Data & Systems: Python, SQL, PostgreSQL (Supabase), MQTT, REST APIs, real-time data pipelines, Azure Kinect SDK

Other: Kotlin, JavaScript, C#, C++, Unity, Git/GitHub | **Fundamentals:** Data Structures & Algorithms, OOP

EDUCATION

B.Sc. (Hons.) Computer Science, University of Delhi — CGPA 7.72 *2023 – 2027*

Class XII (CBSE, PCM), N.K. Bagrodia Public School — 89.2% *2023*

ACHIEVEMENTS

- Guest Speaker at **AWE Nite Orlando**; Guest Lecturer on XR & AI at Jindal University of Art and Architecture.
- Open-source contributor to **Mozilla Firefox** and **Bentley iTwin**.
