SUMMARY

XR developer and final-year Computer Science student (University of Delhi, 2027) with **2+ years shipping AR/VR** in **Unity, Unreal, ARCore, WebXR and Meta XR**. Former CTO of an XR startup, international speaker at **AWE Nite Orlando**, and now building indoor navigation and AR wayfinding for GMR at IGI Airport.

EXPERIENCE

AI and Automation Intern | GMR Group — Smart Airport City, IGI Airport *Jun 2026 – Present*

- Built an **ARCore proof-of-concept** for the airport's **AR wayfinding system**, validating the navigation flow before the vendor's rollout.
- Building Android apps for **Smart Buggy** that use **BLE-beacon indoor positioning (Situm)** mapped to a floor plan with **109 surveyed gates and points** across 2 floors.
- Tablet streams live position over **MQTT every 1 s** to a fleet map and dispatch engine that serve passengers with reduced mobility.

Founding Member & CTO | XRVisionLabs *Feb 2024 – Oct 2025*

- Led AI/XR product development for clients: **2 client projects over 12 months, 3 releases, 100% on time**.
- Led a **6-person team** of developers, designers and researchers; standardised XR development pipelines and docs to shorten client onboarding.

Game Developer | AltReality Labs *Jan 2024 – Aug 2025*

- Shipped **3 physics-based Unity simulations** (archery, bowling, road-crossing) to production with adaptive AI for obstacles and scoring.
- Built and tuned projectile-motion and rigid-body physics for realistic interactions.

Virtual Reality Development Intern | University of Delhi *Feb 2024 – May 2026*

- Built full-body tracking with **Azure Kinect at 30 fps**, driving virtual avatars through sensor fusion; automated the tracking setup.
- Prototyped interaction systems in **Unity and Unreal Engine**.

PROJECTS

Combat-XR — Defence Training Simulator — *Unity, XR Interaction Toolkit*

- Tactical VR training simulation with AI-driven scenario management, translating real defence training workflows into interactive drills.

XRchitect — Multiplayer VR Interior Design — *Meta XR SDK, Photon*

- Collaborative VR design app with **Photon** networking keeping shared state in sync across users in real time.

AR Indoor Navigation — *WebXR, SVG, JavaScript*

- Marker-based browser AR navigation with path-finding overlaid on physical spaces; no app install needed.

Unreal Pixel Streaming — *Unreal Engine*

- Streamed a high-fidelity Unreal scene to any browser, automating the build and distribution pipeline end to end.

SKILLS

XR: Unity 3D, Unreal Engine, ARCore, Meta XR SDK, XR Interaction Toolkit, WebXR, Three.js, Photon, Azure Kinect, Situm indoor positioning

Languages: C#, C++, Kotlin, JavaScript, Python | **Backend:** Node.js, REST APIs, MQTT, PostgreSQL

Other: Physics simulation, Unity ML-Agents, Git/GitHub, Android Studio

EDUCATION

B.Sc. (Hons.) Computer Science, University of Delhi — CGPA 7.72 *2023 – 2027*

Class XII (CBSE, PCM), N.K. Bagrodia Public School — 89.2% *2023*

ACHIEVEMENTS

- Guest Speaker at **AWE Nite Orlando**, international XR industry conference.
- Guest Lecturer on XR & AI at **Jindal University of Art and Architecture**.
- Open-source contributor to **Bentley iTwin** (digital twins) and **Mozilla Firefox**.
